

SEMI-AUTOMATIC POLISHING MACHINE

The Modern Series Polishing Machine is a professional-grade solution designed to give your metallurgical samples a flawless, mirror-like finish. Built for both durability and ease of use, this machine is an essential tool for any laboratory or quality control department.

APPLICATION :

This grinder polisher is of double plate. It is suitable for pre grinding, grinding and polishing metallographic specimens. Since the machine is speed-adjusted by microprocessor, it can run at a revolution of 0 to 1400rpm, which favors the machine with wide applications. The machine is equipped with cooling system that can cool down the specimen during pre-grinding so as to prevent overheating and damage the metallographic structure. Featuring easy operation and reliable performance, it is an indispensable device for the factories, research institutions and college labs to prepare metallographic specimen
